MCAS

Goal Setting

The Issues for Youth / Group Guidance Curriculum is designed to help students explore their future options. The process of self-exploration and career exploration helps students to identify their strengths, weakness and interests. The primary goal is to help students to see the relationship between high school, post-secondary education, and careers.

- *Students will understand that high school curriculum and academic performance will affect their futures.*
- *Students will understand the importance of self-exploration, self-awareness, and career exploration.*

Essential Questions

- Students will ask themselves what careers they want to have as adults and what they need to do now to achieve this goal

Knowledge

- Students need to know how to question themselves, their skills, interests and goals.

Skills

- These skills will serve students well across the curriculum. They will help to improve their self-esteem.
- These skills will help students focus in other classes and help them see the relevance of school.
