EVALUATION OF SCHOOL COMMITTEE GOALS

The School Committee will establish annual goals prior to the start of the school year. These goals may relate to its communication and relationship with the Superintendent and other town committees and the public, the development and performance of each member, the need for and performance of each subcommittee, the conduct of the Committee meetings, and its performance with respect to policy development, fiscal management, and educational leadership. The School Committee will evaluate itself against these goals at the second meeting in January and at a May meeting prior to the town election.
